• Engineer report on file from JHA

1. Pump station equipment should be delivered by mid to late March 2024.
2. In the month of January 2024 there were 6 violations. Effluent limits had violations, specific to TSS & BOD (avg week, avg month). Total violations requiring civil penalties payable to DEP is six (6).
3. Travis Long CEP, LO commented that he and his team strongly believe the receipt of the heating oil from 300 Center St., Greenfield Twp PA 18407, has affected the sludge and biological activity during the exposure. While there wasn't a noticeable product on the surface aside from the odor, and analytical testing by PACE Labs, it appears to be the cause and affect upset of the sludge balance, age, and biological activity. It is recommended that the civil penalties should be discussed and passed along to the resident that intentionally discharged unacceptable waste into the system.

Motion to accept engineer's report as given by M. Graziano,
2nd D. Flynn, all in favor.
